

Security-Led Technology Management

A Top7 CTO/CIO Service • **FRACTIONAL**

Technology leadership built on Top7's CISO bench, so security is designed in from the start rather than bolted on later. You avoid the costly security retrofits that come from treating risk as an afterthought.

HOW IT WORKS

1. Assess technology & security posture together
2. Build a secure-by-design roadmap
3. Execute with security built in
4. Report on both delivery & risk

VALUE TO YOU

- Security isn't bolted on — it's built in
 - One team owns both technology and risk
 - Fewer costly security retrofits later
-

Let's talk about your technology roadmap. info@top7llc.com | www.top7llc.com
